

**UNOFFICIAL PROPOSED AMENDMENT**

21. (proposed amendment): An ocular apparatus comprising:

- a housing member configured to be at least partially placed beneath one of the upper and lower eyelids, and directly adjacent an eye of a patient;
- a medicament containment member integral associated with the housing;
- ~~- a current distribution member in electrical communication with the medicament containment member;~~ and,
- a handle member being operably connected to the housing;
- wherein ~~the housing member in combination with the~~ handle member cooperates with a corner of the patient's eye to maintain registered placement of the ocular apparatus.

22. (proposed amendment): The apparatus of claim 21 wherein the handle member is rigid ~~comprises a first handle region and a second handle region extending outwardly from the handle member, the first and second handle regions being spaced apart a predetermined distance, a lateral straddling member being associated with the first handle region and a medial straddling member being associated with the second handle region.~~
